

Use '>', '<' or '=' to compare the fractions.

Ex)  $\frac{2}{12} < \frac{4}{5}$

1)  $\frac{5}{12} < \frac{3}{5}$

2)  $\frac{1}{4} > \frac{1}{8}$

3)  $\frac{2}{5} < \frac{7}{12}$

4)  $\frac{1}{4} < \frac{4}{5}$

5)  $\frac{3}{6} < \frac{3}{4}$

6)  $\frac{9}{10} > \frac{1}{12}$

7)  $\frac{4}{12} < \frac{3}{6}$

8)  $\frac{8}{10} > \frac{2}{3}$

9)  $\frac{8}{10} > \frac{1}{5}$

10)  $\frac{3}{12} < \frac{9}{10}$

11)  $\frac{1}{8} < \frac{6}{10}$

12)  $\frac{2}{3} < \frac{9}{10}$

13)  $\frac{3}{5} > \frac{1}{10}$

14)  $\frac{2}{5} > \frac{1}{6}$

15)  $\frac{2}{8} > \frac{2}{10}$

16)  $\frac{3}{5} > \frac{2}{6}$

17)  $\frac{11}{12} > \frac{2}{3}$

18)  $\frac{2}{3} > \frac{3}{12}$

19)  $\frac{5}{10} < \frac{8}{12}$

20)  $\frac{2}{4} < \frac{3}{5}$

Answers

Ex.           <          

1.           <          

2.           >          

3.           <          

4.           <          

5.           <          

6.           >          

7.           <          

8.           >          

9.           >          

10.           <          

11.           <          

12.           <          

13.           >          

14.           >          

15.           >          

16.           >          

17.           >
