Answers

- 1) John had forty-seven dollars. For his birthday he got six more dollars but spent seventeen on a new game. How much money does he have now?
- 2) At the school's book fair Dave bought forty-five adventure books and three mystery books. If forty of the books were used, how many new books did he buy?
- 3) A waiter at 'The Greasy Spoon' restaurant had forty-four customers to wait on. During the lunch rush he added another forty-one customers. If sixty-four of the customers didn't leave him a tip, how many customers did leave a tip?
- 4) Luke was trying to expand his game collection. He bought twenty-seven games from a friend and bought fourteen more at a garage sale. If twenty-two of the games didn't work, how many good games did he end up with?
- 5) For the school bake sale Tiffany made pastries. She baked thirty-three cupcakes and forty-six cookies. After the sale she had forty-five to take back home. How many pastries did she sell?
- 6) The school cafeteria ordered forty-four red apples and twenty-four green apples for student's lunches. But, if only fifty-nine students wanted fruit, how many extra did the cafeteria end up with?
- 7) Olivia picked nineteen tulips and twenty-seven roses to make flower bouquets. If she only used thirty of the flowers though, how many extra flowers did Olivia pick?
- 8) At the arcade, Oliver won forty-six tickets playing 'whack a mole' and fifty tickets playing 'skee ball'. If he spent ten of his tickets on a hat, how many tickets does Oliver have left?
- 9) Debby had forty-nine math problems and thirty-five science problems for homework. If she finished thirty-four of the problems at school, how many problems did she have to do for homework?
- 10) For Halloween Rachel and her sister combined the candy they received. Rachel had twenty-nine pieces of candy while her sister had forty-eight. If they ate seventy-four pieces the first night, how many pieces do they have left?
