Two Step Problems

Name:

Solve each problem.

1) Gwen's team won their baseball game and scored fifty-four points total. If Gwen scored forty of the points and everyone else scored seven points each, how many players were on her team?

2) The cafeteria had forty-nine apples. For lunch they handed out twenty-nine to students and decided to use the rest to make pies. If each pie takes four apples, how many pies could they make?

3) For Halloween Robin received fifty pieces of candy. She ate thirty-five pieces then placed the rest into piles with five in each pile. How many piles could she make?

4) A waiter had fifty-five customers in his section. If thirty-four of them left and the rest of his tables had three people at each table, how many tables did he have?

5) Tiffany was planting vegetables in her garden. She started with sixty-three seeds and planted twenty-seven of them in the big garden and in each of her small gardens put four seeds each. How many small gardens did Tiffany have?

6) Vanessa had fifty-three files on her computer. She deleted five of them and put the rest into folders with six files in each one. How many folders did Vanessa end up with?

7) Bianca baked fifty-six cupcakes for her school's bake sale. If her brother, Todd, ate forty-eight of them how many packages could she make if she put four cupcake in each package?

8) A pet store had thirty-seven puppies. In one day they sold thirty-one of them and put the rest into cages with two in each cage. How many cages did they use?

9) Luke had seventy-four dollars. If he spent thirty-eight bucks on a new game, how many six dollar toys could he buy with the money he had left?

10) Victor made sixty-two dollars mowing lawns over the summer. If he spent six dollars buying new mower blades, how many eight dollar games could he buy with the money he had left?

Answers
1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
