

Solve each problem.

Answers

- 1) Edward bought eleven boxes of chocolate candy and gave eight to his little brother. If each box has four pieces inside it, how many pieces did Edward still have?
- 2) At the fair Sam bought seventeen tickets. After riding the ferris wheel he had nine tickets left. If each ticket cost nine dollars, how much money did Sam spend riding the ferris wheel?
- 3) In a video game, each enemy defeated gives you nine points. If a level has thirteen enemies total and you destroy all but seven of them, how many points would you earn?
- 4) Sarah baked six brownies, but needed fifteen total for her party. If she used six spoonfuls of flour on each one, how much cups of flour does she still need?
- 5) A painter needed to paint eleven rooms in a building. Each room takes six hours to paint. If he already painted four rooms, how much longer will he take to paint the rest?
- 6) April's discount flowers was having a sale where each rose was two dollars. If April started with thirteen roses and had four roses left, how much money did she earn?
- 7) At a restaurant each adult meal costs \$5 and kids eat free. If a group of ten people came in and three were kids, how much would it cost for the group to eat?
- 8) A new building needed twelve windows. The builder had already installed nine of them. If it takes eight hours to install each window, how long will it take him to install the rest?
- 9) Each chocolate bar in a box cost \$9. If a box had eleven bars total and Emily sold all but three bars, how much money would she have made?
- 10) Amy earned nine points for each bag of cans she recycled. If she had five bags, but didn't recycle three of them, how many points would she have earned?
