

Solve each problem.

1) $\frac{1}{2} - \frac{3}{8} =$

2) $\frac{1}{2} + \frac{3}{6} =$

3) $\frac{1}{2} - \frac{2}{5} =$

4) $\frac{7}{9} + \frac{3}{8} =$

5) $\frac{7}{9} - \frac{1}{2} =$

6) $\frac{5}{6} + \frac{1}{3} =$

7) $\frac{5}{7} - \frac{1}{3} =$

8) $\frac{5}{10} + \frac{1}{4} =$

9) $\frac{1}{3} - \frac{1}{6} =$

10) $\frac{6}{10} + \frac{3}{8} =$

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Solve each problem.

1) $\frac{1}{2} - \frac{3}{8} = \frac{4}{8} - \frac{3}{8} = \frac{1}{8}$

2) $\frac{1}{2} + \frac{3}{6} = \frac{3}{6} + \frac{3}{6} = \frac{6}{6} = 1$

3) $\frac{1}{2} - \frac{2}{5} = \frac{5}{10} - \frac{4}{10} = \frac{1}{10}$

4) $\frac{7}{9} + \frac{3}{8} = \frac{56}{72} + \frac{27}{72} = \frac{83}{72} = 1\frac{11}{72}$

5) $\frac{7}{9} - \frac{1}{2} = \frac{14}{18} - \frac{9}{18} = \frac{5}{18}$

6) $\frac{5}{6} + \frac{1}{3} = \frac{5}{6} + \frac{2}{6} = \frac{7}{6} = 1\frac{1}{6}$

7) $\frac{5}{7} - \frac{1}{3} = \frac{15}{21} - \frac{7}{21} = \frac{8}{21}$

8) $\frac{5}{10} + \frac{1}{4} = \frac{10}{20} + \frac{5}{20} = \frac{15}{20}$

9) $\frac{1}{3} - \frac{1}{6} = \frac{2}{6} - \frac{1}{6} = \frac{1}{6}$

10) $\frac{6}{10} + \frac{3}{8} = \frac{24}{40} + \frac{15}{40} = \frac{39}{40}$

Answers

1. $\frac{1}{8}$
2. $1\frac{0}{6}$
3. $\frac{1}{10}$
4. $1\frac{11}{72}$
5. $\frac{5}{18}$
6. $1\frac{1}{6}$
7. $\frac{8}{21}$
8. $\frac{15}{20}$
9. $\frac{1}{6}$
10. $\frac{39}{40}$
