

Convert the fraction to a decimal.

$$\frac{9}{10}$$

$$\frac{63}{100}$$

Converting from a fraction to a decimal is simple as long as you remember the place values.

The example above is nine-tenths. Lets look at how we'd write that as a decimal.

We do the same thing for the problem above only make sure we're in the hundredths place.

Convert the fraction to a decimal.

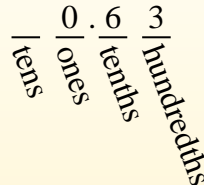

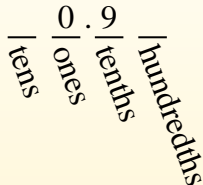

$$\frac{9}{10}$$

$$\frac{63}{100}$$

Converting from a fraction to a decimal is simple as long as you remember the place values.

The example above is nine-tenths. Lets look at how we'd write that as a decimal.

We do the same thing for the problem above only make sure we're in the hundredths place.
