Multiplying Fractions by Whole Numbers (visual)

Name:

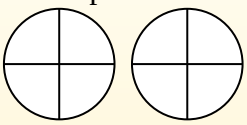
Use the visual model to solve each problem.

$^{2}/_{4} \times 3 =$

To solve multiplication problems with fractions one strategy is to think of them as addition problems.
For example the problem above is the same as:
$^{2}/_{4} + {}^{2}/_{4} + {}^{2}/_{4}$

$^{2}/_{4} \times 3 =$

If we shade in 2/4 on the fractions below 3 times we can see a visual representation of the problem.



$^{2}/_{4} \times 3 = 1\ {}^{2}/_{4}$

After shading it in we can see why 2/4 three times is equal to 1 whole and $^{2}/_{4}$.
