

Determine which quadrant each pair of coordinates will be in.

**Ex)** (12 , -20)                      (12 , 20)                      (-12 , 20)                      (-12 , -20)

**1)** (-18 , 17)                      (18 , 17)                      (18 , -17)                      (-18 , -17)

**2)** (3 , 1)                      (-3 , -1)                      (-3 , 1)                      (3 , -1)

**3)** (-17 , -2)                      (17 , -2)                      (-17 , 2)                      (17 , 2)

**4)** (7 , -8)                      (-7 , 8)                      (-7 , -8)                      (7 , 8)

**5)** (16 , -13)                      (16 , 13)                      (-16 , 13)                      (-16 , -13)

**6)** (-5 , -5)                      (5 , -5)                      (-5 , 5)                      (5 , 5)

**7)** (-14 , 3)                      (14 , 3)                      (14 , -3)                      (-14 , -3)

**8)** (5 , 5)                      (-5 , -5)                      (-5 , 5)                      (5 , -5)

**9)** (-11 , -6)                      (11 , -6)                      (-11 , 6)                      (11 , 6)

**10)** (9 , -20)                      (-9 , -20)                      (-9 , 20)                      (9 , 20)

Answers

Ex. 4 1 2 3

1. \_\_\_\_\_
