

Solve each problem.

Answers

- 1) Isabel was organizing her book case making sure each of the shelves had exactly eight books on it. If she had eight shelves of mystery books and two shelves of picture books, how many books did she have total?
- 2) While shopping for music online, Olivia bought four country albums and four pop albums. Each album came with a lyric sheet and had seven songs. How many songs did Olivia buy total?
- 3) While playing a trivia game, Cody answered eight questions correct in the first half and two questions correct in the second half. If each question was worth three points, what was his final score?
- 4) A waiter had five tables he was waiting on, with three women and six men at each table. How many customers total did the waiter have?
- 5) Rachel had six pages of math homework and two pages of reading homework. If each page had nine problems on it, how many problems did she have to complete total?
- 6) Edward was putting his spare change into piles. He had four piles of quarters and three piles of dimes. If each pile had four coins in it, how many coins did he have total?
- 7) Dave and his friend were buying trick decks from the magic shop for six dollars each. How much did they spend if Dave bought six decks and his friend bought three decks?
- 8) At the town carnival Victor rode the ferris wheel seven times and the bumper cars three times. If each ride cost eight tickets, how many tickets did he use?
- 9) Lana was playing a video game where she scores nine points for each treasure she finds. If she found five treasures on the first level and five on the second, what would her score be?
- 10) Kaleb was collecting cans for recycling. On Saturday he filled two bags up and on Sunday he filled eight more bags. If each bag had three cans in it, how many cans did he pick up total?
