Solve each problem.

1) For Halloween Carol and her sister combined the candy they received. Carol had eighteen pieces of candy while her sister had thirty-three. If they ate ten pieces the first night, how many pieces do they have left?
2) Paige had seven math problems and forty-seven science problems for homework. If she finished thirty-three of the problems at school, how many problems did she have to do for homework?
3) At the school's book fair George bought thirty-six adventure books and twenty-three mystery books. If twenty-five of the books were used, how many new books did he buy?
4) While shopping, Robin bought nine green towels and forty-three white towels. If she gave her mother seventeen of them, how many towels did Robin end up with?
5) Tom started his own lawn mowing business. In the spring he made thirty-four dollars mowing lawns and in the summer he made sixteen dollars. If he had to spend seven dollars buying supplies, how much money did he end up with?
6) Katie and her mom were picking carrots from their garden. Katie picked seventeen and her mother picked twenty-five. If only twenty-seven of the carrots were good, how many bad carrots did they have?
7) Janet bought two coloring books. One had forty pictures and the other had forty-six. After one week she had already colored thirty-three of the pictures. How many pictures does she still have to color?
8) A pet store had twenty-eight siamese cats and eleven house cats. During a sale they sold five cats. How many cats do they have left?
9) While on vacation, Rachel took forty-seven pictures at the zoo and six at the museum. If she later deleted eighteen of the pictures, how many pictures from her vacation did she still have?
10) At the arcade, Edward won twenty-six tickets playing 'whack a mole' and forty-seven tickets playing 'skee ball'. If he spent two of his tickets on a hat, how many tickets does Edward have left?
