Name:

Solve each problem.

1) Vanessa had three math problems and seven science problems for homework. If she finished four of the problems at school, how many problems did she have to do for homework?

1. _____

2. _____

2) While shopping, Katie bought forty-nine green towels and twenty white towels. If she gave her mother sixty-five of them, how many towels did Katie end up with?

3. _____

4. _____

3) A pet store had twenty-nine siamese cats and fourteen house cats. During a sale they sold two cats. How many cats do they have left?

5. _____

6. _____

4) Will was trying to expand his game collection. He bought sixteen games from a friend and bought thirty-seven more at a garage sale. If thirty-seven of the games didn't work, how many good games did he end up with?

7. _____

8. _____

5) Tiffany bought two coloring books. One had thirty-eight pictures and the other had forty-three. After one week she had already colored twenty-five of the pictures. How many pictures does she still have to color?

9. _____

10. _____

6) Olivia picked twenty-five tulips and twenty-eight roses to make flower bouquets. If she only used forty of the flowers though, how many extra flowers did Olivia pick?

7) Sarah and her mom were picking carrots from their garden. Sarah picked two and her mother picked eight. If only four of the carrots were good, how many bad carrots did they have?

8) Billy started his own lawn mowing business. In the spring he made thirty dollars mowing lawns and in the summer he made twenty-two dollars. If he had to spend forty-three dollars buying supplies, how much money did he end up with?

9) Adam had eighteen dollars. For his birthday he got twenty-one more dollars but spent thirteen on a new game. How much money does he have now?

10) There were seven girls and thirty-two boys trying out for the school's basketball team. If only thirty-five of them got called back, how many students didn't make the cut?
