

Solve each problem.

Answers

- 1) The school cafeteria ordered twenty-nine red apples and thirty-two green apples for student's lunches. But, if only thirteen students wanted fruit, how many extra did the cafeteria end up with?
- 2) Olivia bought two coloring books. One had nine pictures and the other had sixteen. After one week she had already colored four of the pictures. How many pictures does she still have to color?
- 3) Katie picked twenty-four tulips and nine roses to make flower bouquets. If she only used seven of the flowers though, how many extra flowers did Katie pick?
- 4) Ned started his own lawn mowing business. In the spring he made thirty-five dollars mowing lawns and in the summer he made nineteen dollars. If he had to spend forty-one dollars buying supplies, how much money did he end up with?
- 5) A pet store had thirty-two siamese cats and forty-one house cats. During a sale they sold fifty-four cats. How many cats do they have left?
- 6) Dave was trying to expand his game collection. He bought ten games from a friend and bought thirty-three more at a garage sale. If four of the games didn't work, how many good games did he end up with?
- 7) Paul had twenty-nine dollars. For his birthday he got forty more dollars but spent thirteen on a new game. How much money does he have now?
- 8) While on vacation, Nancy took eight pictures at the zoo and twenty-one at the museum. If she later deleted sixteen of the pictures, how many pictures from her vacation did she still have?
- 9) Emily had four music files and forty-eight video files on her flash drive. If she deleted fifty-one of the files, how many files were still on her flash drive?
- 10) While shopping, Tiffany bought thirty green towels and thirty white towels. If she gave her mother twenty-two of them, how many towels did Tiffany end up with?
