Two Step Problems

Name:

Solve each problem.

1) For Halloween Robin and her sister combined the candy they received. Robin had thirty-two pieces of candy while her sister had thirty-one. If they ate fifty-seven pieces the first night, how many pieces do they have left?

1. _____

2. _____

2) A waiter at 'The Greasy Spoon' restaurant had twenty-two customers to wait on. During the lunch rush he added another forty-four customers. If twenty-eight of the customers didn't leave him a tip, how many customers did leave a tip?

3. _____

4. _____

3) A pet store had three siamese cats and fourteen house cats. During a sale they sold thirteen cats. How many cats do they have left?

5. _____

6. _____

4) Debby was playing a trivia game. In the first round she scored twenty points and in the second round she scored fifty points. In the last round she lost forty-five points. How many points did she have at the end of the game?

7. _____

8. _____

5) The school cafeteria ordered nineteen red apples and forty-five green apples for student's lunches. But, if only fifty-one students wanted fruit, how many extra did the cafeteria end up with?

9. _____

10. _____

6) Maria bought two coloring books. One had twenty pictures and the other had thirty-nine. After one week she had already colored thirty-five of the pictures. How many pictures does she still have to color?

7) John had twenty-six dollars. For his birthday he got twelve more dollars but spent sixteen on a new game. How much money does he have now?

8) Dave had to wash sixteen short sleeve shirts and thirty-eight long sleeve shirts before school. If he had only washed fifty-three of them by the time school started, how many did he not wash?

9) Billy started his own lawn mowing business. In the spring he made thirty-eight dollars mowing lawns and in the summer he made twenty-one dollars. If he had to spend thirteen dollars buying supplies, how much money did he end up with?

10) Haley and her mom were picking carrots from their garden. Haley picked forty-eight and her mother picked forty-one. If only twenty of the carrots were good, how many bad carrots did they have?

Solve each problem.

1) For Halloween Robin and her sister combined the candy they received. Robin had thirty-two pieces of candy while her sister had thirty-one. If they ate fifty-seven pieces the first night, how many pieces do they have left?

1. _____ **6**

2) A waiter at 'The Greasy Spoon' restaurant had twenty-two customers to wait on. During the lunch rush he added another forty-four customers. If twenty-eight of the customers didn't leave him a tip, how many customers did leave a tip?
