

**Determine which choice shows the expression used to solve the problem.****Answers**

- 1) A pet store had seven cages of snakes with three snakes in each cage. How many snakes did the pet store have total?  
A.  $7 + 3$                       B.  $7 - 3$                       C.  $7 \times 3$                       D.  $7 \div 3$
- 2) John bought eleven books at the book fair. If he gave four of them to his brother, how many books did he have left?  
A.  $11 + 4$                       B.  $11 - 4$                       C.  $11 \times 4$                       D.  $11 \div 4$
- 3) Maria was placing her pencils into rows with eight pencils in each row. If she had sixteen pencils, how many rows could she make?  
A.  $16 + 8$                       B.  $16 - 8$                       C.  $16 \times 8$                       D.  $16 \div 8$
- 4) Isabel was buying DVDs of her favorite TV series. Each season had four DVDs. If she bought eight seasons how many DVDs did she buy total?  
A.  $4 + 8$                       B.  $8 - 4$                       C.  $4 \times 8$                       D.  $8 \div 4$
- 5) A chef can cook six meals in a minute. How many meals could he cook in three minutes?  
A.  $6 + 3$                       B.  $6 - 3$                       C.  $6 \times 3$                       D.  $6 \div 3$
- 6) Each room in a new house needs to have three outlets. If the contractor buys twelve outlets, how many rooms are in the house?  
A.  $12 + 3$                       B.  $12 - 3$                       C.  $12 \times 3$                       D.  $12 \div 3$
- 7) A pet store had two different types of cats. They had three house cats and they had seven siamese cats. How many cats did they have total?  
A.  $3 + 7$                       B.  $7 - 3$                       C.  $3 \times 7$                       D.  $7 \div 3$
- 8) Ned was drawing super heroes on a sheet of scrap paper. He drew twelve pictures total. If he drew nine on the back. How many heroes did he draw on the front?  
A.  $12 + 9$                       B.  $12 - 9$                       C.  $12 \times 9$                       D.  $12 \div 9$
- 9) A chef had thirteen potatoes to make fries with, but he only used four of them. How many potatoes does he still have?  
A.  $13 + 4$                       B.  $13 - 4$                       C.  $13 \times 4$                       D.  $13 \div 4$
- 10) Kaleb had forty-eight pieces of candy. If he put them into bags with six pieces in each bag, how many bags would he have?  
A.  $48 + 6$                       B.  $48 - 6$                       C.  $48 \times 6$                       D.  $48 \div 6$
