

Determine the answer by using rounding strategies.

When adding or subtracting time, it is often easier to round to the next hour first. In the example below we can round 1 hour and 55 minutes up to 2 hours (5 minutes more).

$$6:25 + 1 \text{ hours and } 55 \text{ minutes}$$

$$6:25 + 2 \text{ hours} = 8:25$$

When rounded to 2 hours, we can easily see that $6:25 + 2 \text{ hours}$ is $8:25$. But since we added 5 minutes, now we must take away 5 minutes.

$$8:25 - 5 \text{ Minutes} = \mathbf{8:20}$$

And now we know the elapsed time!
