Solve each problem.

1) Given the numbers 63 and 81, how much would you need to add to the smaller number to make it greater than the larger number?

2) Given the numbers 87 and 92, how much would you need to subtract from the larger number to make it less than the smaller number?

3) Given the numbers 87 and 46, how much would you need to add to the smaller number to make it greater than the larger number?

4) Given the numbers 58 and 90, how much would you need to add to the smaller number to make it even with the larger number?

5) Given the numbers 39 and 95, how much would you need to add to the smaller number to make it even with the larger number?

6) Given the numbers 71 and 43, how much would you need to subtract from the larger number to make it less than the smaller number?

7) Given the numbers 47 and 17, how much would you need to subtract from the larger number to make it less than the smaller number?

8) Given the numbers 58 and 40, how much would you need to add to the smaller number to make it greater than the larger number?

9) Given the numbers 30 and 92, how much would you need to subtract from the larger number to make it less than the smaller number?

10) Given the numbers 48 and 98, how much would you need to add to the smaller number to make it even with the larger number?

11) Given the numbers 89 and 13, how much would you need to subtract from the larger number to make it less than the smaller number?

12) Given the numbers 13 and 94, how much would you need to add to the smaller number to make it greater than the larger number?
Solve each problem.
