

**Solve each problem.****Answers**

- 1) Frank was helping the cafeteria workers pick up lunch trays, but he could only carry nine trays at a time. If he had to pick up seventeen trays from one table and thirty-seven trays from another, how many trips will he make?
- 2) A vase can hold nine flowers. If you had nine carnations and nine roses, how many vases would you need to hold the flowers?
- 3) Katie and her friends were recycling paper for their class. For every five pounds they recycled they earned 1 point. If Katie recycled thirteen pounds and her friends recycled twelve pounds, how many points did they earn?
- 4) Sam made nineteen dollars mowing lawns and thirty-seven dollars weed eating. If he only spent seven dollar a week, how long would the money last him?
- 5) Lana's class is going on a field trip to the zoo. If each van can hold nine people and there are forty-eight students and twenty-four adults going, how many vans will they need?
- 6) Tiffany uploaded sixteen pictures from her phone and forty-eight from her camera to Facebook. If she sorted the pics into eight different albums with the same amount of pics in each album, how many pictures were in each of the albums?
- 7) The school's baseball team had three new players and twenty-nine returning players. If the coach put them into groups with four players in each group, how many groups would there be?
- 8) For a birthday party Ned bought fifty-four regular sodas and two diet sodas. If his fridge would only hold seven on each shelf, how many shelves would he fill up?
- 9) Olivia's old washing machine could only wash four pieces of clothing at a time. If she had to wash four shirts and four sweaters how many loads would she have to do?
- 10) For Halloween Sarah received twenty-five pieces of candy from neighbors and twenty-four pieces from her older sister. If she only ate seven pieces a day, how long would the candy last her?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
