

**Solve each problem.****Answers**

- 1) Rachel picked sixty-seven flowers for her friend's wedding. She was making bouquets with four flowers in each one. If forty-three of the flowers wilted before the wedding, how many bouquets could she still make?
- 2) John made thirty-eight dollars mowing lawns over the summer. If he spent twenty dollars buying new mower blades, how many six dollar games could he buy with the money he had left?
- 3) Paul had forty-seven pieces of clothing to wash. He put thirty-three of them in one load, but decided to split the rest into two equal loads. How many pieces of clothing could go in each of the small loads?
- 4) Victor is at the library helping put away books. There are sixty-one book to put away total but a librarian takes twenty-one of them and leaves Victor with the rest. If he can fit eight books on a shelf, how many shelves will he need?
- 5) Dave bought thirty-five tickets at the state fair. He spent three tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost eight tickets, how many rides could he go on?
- 6) Carol was planting vegetables in her garden. She started with fifty-five seeds and planted thirty-one of them in the big garden and in each of her small gardens put three seeds each. How many small gardens did Carol have?
- 7) Katie uploaded fifty-seven pictures to Facebook. She put forty-three pics into one album and put the rest into seven different albums. How many pictures were in each of the seven albums?
- 8) A waiter had one hundred nineteen customers in his section. If forty-seven of them left and the rest of his tables had eight people at each table, how many tables did he have?
- 9) A company invited forty-four people to a luncheon, but thirty-two of them didn't show up. If the tables they had held six people each, how many tables do they need?
- 10) Frank had thirty-one dollars. If he spent sixteen bucks on a new game, how many five dollar toys could he buy with the money he had left?
