

**Solve each problem.****Answers**

- 1) Tom bought thirteen boxes of chocolate candy and gave nine to his little brother. If each box has eight pieces inside it, how many pieces did Tom still have?
- 2) At a restaurant each adult meal costs \$7 and kids eat free. If a group of eight people came in and five were kids, how much would it cost for the group to eat?
- 3) April's discount flowers was having a sale where each rose was six dollars. If April started with seventeen roses and had nine roses left, how much money did she earn?
- 4) At lunch a waiter had ten customers and six of them didn't leave a tip. If he got \$8 each from the ones who did tip, how much money did he earn?
- 5) Adam had seven action figures, but needed eleven total for a complete collection. If each one costs \$2, how much money would he need to finish his collection?
- 6) At the fair Ned bought ten tickets. After riding the ferris wheel he had six tickets left. If each ticket cost eight dollars, how much money did Ned spend riding the ferris wheel?
- 7) Cody invited sixteen friends to a birthday party, but seven couldn't come. If he wanted to buy enough cupcakes so each person could have exactly seven, how many should he buy?
- 8) Each chocolate bar in a box cost \$5. If a box had eleven bars total and Katie sold all but eight bars, how much money would she have made?
- 9) A worksheet had six problems on it. If a teacher had eight worksheets to grade and had already graded three of them, how many more problems does she have to grade?
- 10) A painter needed to paint nine rooms in a building. Each room takes two hours to paint. If he already painted six rooms, how much longer will he take to paint the rest?
