

Use each diagram to solve the problems.

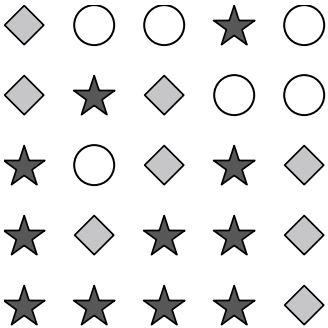

- 1) If you spun the spinner 1 time, what is the probability it would land on a white piece?
- 2) If you spun the spinner 1 time, what is the probability it would land on a black piece?
- 3) If you spun the spinner 1 time, what is the probability it would land on a gray piece?
- 4) If you spun the spinner 1 time, what is the probability of landing on either a black piece or a white piece?
- 5) How many pieces are there total in the spinner?

- 
- 6) If you were to roll the dice one time what is the probability it will land on a 5?

- 7) If you were to roll the dice one time what is the probability it will NOT land on a 1?
- 8) If you were to roll the dice one time, what is the probability of it landing on an even number?

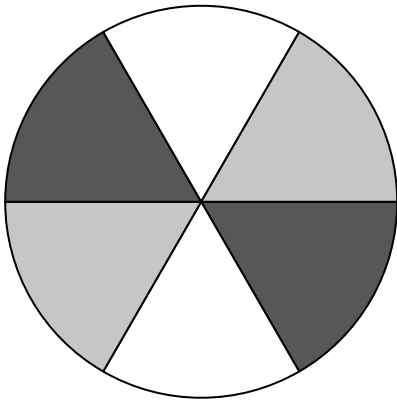

- 9) If you were to select 1 shape at random from the array, what is the probability it will be a star?
- 10) Which shape has a 32.00% chance (8 out of 25) of being selected?
- 11) How many shapes are there total in the array?
- 12) If you were to select 1 shape at random from the array, what shape do you have the greatest probability of selecting?
