

Use '>', '<' or '=' to solve each problem.

Ex)  $\frac{1}{3} < \frac{2}{3}$

1)  $\frac{1}{3} > \frac{1}{10}$

2)  $\frac{2}{3} > \frac{5}{12}$

3)  $\frac{2}{4} < \frac{3}{4}$

4)  $\frac{4}{12} < \frac{4}{3}$

5)  $\frac{4}{5} > \frac{2}{4}$

6)  $\frac{2}{5} < \frac{3}{5}$

7)  $\frac{3}{12} < \frac{3}{8}$

8)  $\frac{1}{6} < \frac{8}{10}$

9)  $\frac{1}{8} < \frac{3}{8}$

10)  $\frac{1}{5} > \frac{1}{12}$

11)  $\frac{3}{10} > \frac{1}{4}$

12)  $\frac{5}{6} > \frac{3}{6}$

13)  $\frac{1}{6} < \frac{1}{5}$

14)  $\frac{1}{3} < \frac{3}{4}$

15)  $\frac{5}{6} > \frac{4}{6}$

16)  $\frac{7}{8} > \frac{7}{12}$

17)  $\frac{1}{6} < \frac{7}{12}$

18)  $\frac{3}{12} < \frac{8}{12}$

19)  $\frac{1}{10} < \frac{1}{5}$

20)  $\frac{3}{6} < \frac{6}{10}$

Answers

Ex.           <          

1.           >          

2.           >          

3.           <          

4.           <          

5.           >          

6.           <          

7.           <          

8.           <          

9.           <          

10.           >          

11.           >
