Use the number line to solve each problem.

1) Which amount is larger, $\frac{3}{4}$ or .70?

2) Which amount is larger, $\frac{3}{6}$ or .62?

3) Which amount is larger, $\frac{3}{4}$ or .63?

4) Which amount is larger, $\frac{4}{5}$ or .68?

5) Which amount is larger, $\frac{3}{5}$ or .41?

6) Which amount is larger, $\frac{7}{9}$ or .61?

7) Which amount is larger, $\frac{1}{6}$ or .32?

8) Which amount is larger, $\frac{6}{9}$ or .77?

9) Which amount is larger, $\frac{5}{8}$ or .49?

10) Which amount is larger, $\frac{1}{2}$ or .33?
1) Which amount is larger, \( \frac{2}{4} \) or \( .70 \) ?

2) Which amount is larger, \( \frac{3}{6} \) or \( .62 \) ?

3) Which amount is larger, \( \frac{3}{4} \) or \( .63 \) ?

4) Which amount is larger, \( \frac{4}{5} \) or \( .68 \) ?

5) Which amount is larger, \( \frac{3}{5} \) or \( .41 \) ?

6) Which amount is larger, \( \frac{7}{9} \) or \( .61 \) ?

7) Which amount is larger, \( \frac{1}{6} \) or \( .32 \) ?

8) Which amount is larger, \( \frac{6}{9} \) or \( .77 \) ?

9) Which amount is larger, \( \frac{5}{8} \) or \( .49 \) ?

10) Which amount is larger, \( \frac{1}{2} \) or \( .33 \) ?
