Use the number line to solve each problem.

1) Which amount is larger, \( \frac{2}{3} \) or .56 ?

2) Which amount is larger, \( \frac{3}{8} \) or .56 ?

3) Which amount is larger, \( \frac{4}{8} \) or .62 ?

4) Which amount is larger, \( \frac{1}{2} \) or .68 ?

5) Which amount is larger, \( \frac{1}{4} \) or .14 ?

6) Which amount is larger, \( \frac{4}{6} \) or .84 ?

7) Which amount is larger, \( \frac{1}{3} \) or .13 ?

8) Which amount is larger, \( \frac{1}{5} \) or .34 ?

9) Which amount is larger, \( \frac{2}{5} \) or .60 ?

10) Which amount is larger, \( \frac{1}{6} \) or .35 ?
Use the number line to solve each problem.

1) Which amount is larger, $\frac{2}{3}$ or .56?

2) Which amount is larger, $\frac{3}{8}$ or .56?

3) Which amount is larger, $\frac{4}{8}$ or .62?

4) Which amount is larger, $\frac{1}{2}$ or .68?

5) Which amount is larger, $\frac{1}{4}$ or .14?

6) Which amount is larger, $\frac{4}{6}$ or .84?

7) Which amount is larger, $\frac{1}{3}$ or .13?

8) Which amount is larger, $\frac{1}{5}$ or .34?

9) Which amount is larger, $\frac{2}{5}$ or .60?

10) Which amount is larger, $\frac{1}{6}$ or .35?

Answers

1. $\frac{2}{3}$
2. .56
3. .62
4. .68
5. $\frac{1}{4}$
6. .84
7. $\frac{1}{3}$
8. .34
9. .60
10. .35
