Partition and label each shape.

Ex) Split the shape into 2 equal parts and label each part.
   \[ \frac{1}{2} \]
   \[ \frac{1}{2} \]

1) Split the shape into 4 equal parts and label each part.
   \[ \frac{1}{4} \]
   \[ \frac{1}{4} \]
   \[ \frac{1}{4} \]
   \[ \frac{1}{4} \]

2) Split the shape into 6 equal parts and label each part.

3) Split the shape into 3 equal parts and label each part.
   \[ \frac{1}{3} \]
   \[ \frac{1}{3} \]
   \[ \frac{1}{3} \]

4) Split the shape into 8 equal parts and label each part.

5) Split the shape into 3 equal parts and label each part.

6) Split the shape into 2 equal parts and label each part.

7) Split the shape into 4 equal parts and label each part.

8) Split the shape into 8 equal parts and label each part.

9) Split the shape into 6 equal parts and label each part.
Partitioning Shapes

Partition and label each shape.

**Ex)** Split the shape into 2 equal parts and label each part.

1) Split the shape into 4 equal parts and label each part.

2) Split the shape into 6 equal parts and label each part.

3) Split the shape into 3 equal parts and label each part.

4) Split the shape into 8 equal parts and label each part.

5) Split the shape into 3 equal parts and label each part.

6) Split the shape into 2 equal parts and label each part.

7) Split the shape into 4 equal parts and label each part.

8) Split the shape into 8 equal parts and label each part.

9) Split the shape into 6 equal parts and label each part.
