Solve each problem. Write your answer as an improper fraction.

1) An empty bulldozer weighed $\frac{23}{10}$ tons. If it scooped up $\frac{52}{10}$ tons of dirt, what would be the combined weight of the bulldozer and dirt?

2) Haley walked $\frac{42}{9}$ miles in the morning and another $\frac{31}{9}$ miles in the afternoon. What was the total distance she walked?

3) At the beach, Victor built a sandcastle that was $\frac{23}{5}$ feet high. If he added a flag that was $\frac{2}{5}$ feet high, what is the total height of his creation?

4) A chef bought $\frac{47}{9}$ pounds of carrots. If he later bought another $\frac{65}{9}$ pounds of carrots, what is the total weight of carrots he bought?

5) While exercising Billy jogged $\frac{41}{8}$ kilometers and walked $\frac{107}{8}$ kilometers. What is the total distance he traveled?

6) A restaurant had $\frac{175}{6}$ gallons of soup at the start of the day. By the end of the day they had $\frac{133}{6}$ gallons left. How many gallons of soup did they use during the day?

7) Bianca bought a bamboo plant that was $\frac{52}{5}$ feet high. When she got it home she cut $\frac{34}{5}$ feet off of it. How tall was the plant after she cut it down?

8) For Halloween, Sarah received $\frac{75}{6}$ pounds of candy. After a week her family had eaten $\frac{34}{6}$ pounds. How many pounds of candy does she have left?

9) Debby had $\frac{83}{4}$ cups of flour. If she used $\frac{61}{4}$ cups baking, how much flour did she have left?

10) Over the weekend Emily spent $\frac{34}{7}$ hours total studying. If she spent $\frac{22}{7}$ hours studying on Saturday, how long did she study on Sunday?
Solve each problem. Write your answer as an improper fraction.

1) An empty bulldozer weighed 2 $\frac{3}{10}$ tons. If it scooped up 5 $\frac{2}{10}$ tons of dirt, what would be the combined weight of the bulldozer and dirt?

2) Haley walked 4 $\frac{2}{9}$ miles in the morning and another 3 $\frac{1}{9}$ miles in the afternoon. What was the total distance she walked?

3) At the beach, Victor built a sandcastle that was 2 $\frac{3}{5}$ feet high. If he added a flag that was 3 $\frac{2}{5}$ feet high, what is the total height of his creation?

4) A chef bought 4 $\frac{7}{9}$ pounds of carrots. If he later bought another 6 $\frac{5}{9}$ pounds of carrots, what is the total weight of carrots he bought?

5) While exercising Billy jogged 4 $\frac{1}{8}$ kilometers and walked 10 $\frac{7}{8}$ kilometers. What is the total distance he traveled?

6) A restaurant had 17 $\frac{5}{6}$ gallons of soup at the start of the day. By the end of the day they had 13 $\frac{3}{6}$ gallons left. How many gallons of soup did they use during the day?

7) Bianca bought a bamboo plant that was 5 $\frac{2}{5}$ feet high. When she got it home she cut 3 $\frac{4}{5}$ feet off of it. How tall was the plant after she cut it down?

8) For Halloween, Sarah received 7 $\frac{5}{6}$ pounds of candy. After a week her family had eaten 3 $\frac{4}{6}$ pounds. How many pounds of candy does she have left?

9) Debby had 8 $\frac{3}{4}$ cups of flour. If she used 6 $\frac{1}{4}$ cups baking, how much flour did she have left?

10) Over the weekend Emily spent 3 $\frac{4}{7}$ hours total studying. If she spent 2 $\frac{2}{7}$ hours studying on Saturday, how long did she study on Sunday?
