Solve each problem.

1) A golf course driving range goes through 173 golf balls a day. How many golf balls would they go through in 797 days?

2) In NYC each mail truck has 296 pieces of junkmail. If there are 418 mail trucks, how much junk mail do they have total?

3) A mail sorting machine can sort 830 pieces of mail an hour. If it ran for 950 hour, how many pieces of mail would it have sorted?

4) If an industrial machine could make 182 pencils in a second, how many pencils would it have made in 704 seconds?

5) A school district ordered 332 new science text books. If each text book had 321 pages in it, how many pages are there total in all the text books?

6) A gas station sells 306 gallons of gas an hour. How much gas would they have sold after 756 hours?

7) A farmer has 452 rows of corn. If he can get 345 ears of corn from each row, how many ears of corn would he have total?

8) A school bought 414 boxes of computer paper for the computer lab. Each box had 884 sheets of paper inside it. How much paper did they buy total?

9) A marathon was 710 meters. If 204 people ran in the marathon how many meters would they have run total?

10) Each day the gumball machine in the mall sells 703 gum balls. How many gum balls would they have sold after 947 days?

### Solve each problem.

1. A coat manufacturer puts 530 coats in a shipment. If they sent out 492 shipments, how many coats would they have sent out?

   **Answer:** 260,760

2. A pallet of toggle bolts weighs 163 kilograms. If a warehouse has 745 pallets, what is their total weight?

   **Answer:** 121,435

3. A school district ordered 816 new science text books. If each text book had 895 pages in it, how many pages are there total in all the text books?

   **Answer:** 730,320

4. A new library received 434 boxes of books with 869 books in each box. How many books did the library receive total?

   **Answer:** 377,146

5. Every hour a soup company produces 869 liters of soup. How much soup would the company have made after 114 hours?

   **Answer:** 99,066

6. A marathon was 457 meters. If 977 people ran in the marathon how many meters would they have run total?

   **Answer:** 446,489

7. A golf course driving range goes through 996 golf balls a day. How many golf balls would they go through in 373 days?

   **Answer:** 371,508

8. In NYC each mail truck has 317 pieces of junkmail. If there are 366 mail trucks, how much junk mail do they have total?

   **Answer:** 116,022

9. A movie theater sells 159 buckets of popcorn a day. If each bucket has 742 pieces of popcorn in it, how many pieces do they sell in a day?

   **Answer:** 117,978

10. Each day 547 new apps are uploaded to a web server. After 583 days, how many apps would have been uploaded?

    **Answer:** 318,901
