Answers

- 1) Robin had twenty-five math problems and thirty-six science problems for homework. If she finished thirty-four of the problems at school, how many problems did she have to do for homework?
- 2) Faye bought two coloring books. One had five pictures and the other had forty-four. After one week she had already colored thirty-five of the pictures. How many pictures does she still have to color?
- 3) Janet picked forty-eight tulips and twenty-two roses to make flower bouquets. If she only used twenty-three of the flowers though, how many extra flowers did Janet pick?
- 4) For the school bake sale Lana made pastries. She baked thirty-six cupcakes and forty-six cookies. After the sale she had forty-two to take back home. How many pastries did she sell?
- 5) There were forty-one girls and twenty-two boys trying out for the school's basketball team. If only fifty-two of them got called back, how many students didn't make the cut?
- 6) While on vacation, Isabel took thirty pictures at the zoo and twelve at the museum. If she later deleted nineteen of the pictures, how many pictures from her vacation did she still have?
- 7) Tiffany had twenty-one music files and thirty-four video files on her flash drive. If she deleted fourteen of the files, how many files were still on her flash drive?
- 8) For Halloween Nancy and her sister combined the candy they received. Nancy had forty-six pieces of candy while her sister had thirty-seven. If they ate twelve pieces the first night, how many pieces do they have left?
- 9) Sam had to wash two short sleeve shirts and forty-three long sleeve shirts before school. If he had only washed thirty-eight of them by the time school started, how many did he not wash?
- 10) Carol and her mom were picking carrots from their garden. Carol picked forty-three and her mother picked ten. If only forty-three of the carrots were good, how many bad carrots did they have?
