Solve each problem.

1) Roger had 45 dollars in January. By March he had spent 20 dollars. If he got another 46 dollars from his mom, how much money would he have?

2) The school cafeteria had 17 apples. If they used 2 to make lunch for the students and then bought 23 more, how many apples would they have?

3) Janet was playing a video game and had 47 lives. In a hard part of the game she lost 23 lives. If she got 46 more lives in the next level, how many lives would she have?

4) Nancy picked 12 carrots from her garden. If she threw out 2 of them and then picked 21 more the next day, how many carrots would she have total?

5) Bianca had 34 songs on her mp3 player. If she deleted 14 old songs from it and then added 44 new songs, how many songs does she have on her mp3 player?

6) Tom had 5 books. If he sold 4 of them and used the money he earned to buy 38 new books, how many books would Tom have?

7) John had 33 socks. If he threw away 19 old ones that didn't fit and bought 13 new ones, how many socks would he have?

8) For the school bake sale Maria made 19 cupcakes. If she sold 5 of them and then made 10 more, how many cupcakes would she have?

9) A store had 50 oranges in a bin. If they threw away 40 of the old ones and put 24 new ones in the bin how many would be in the bin?

10) In fourth grade there were 8 students at the start of the year. During the year 5 students left and 8 new students came to school. How many students were in fourth grade at the end?
