Solve each problem.

1) John bought fifty-nine tickets at the state fair. He spent twenty-nine tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost five tickets, how many rides could he go on?

2) George is at the library helping put away books. There are forty-seven books to put away total but a librarian takes eleven of them and leaves George with the rest. If he can fit six books on a shelf, how many shelves will he need?

3) A store had fifty-four coloring books in stock. They ended up putting them on sale and getting rid of thirty-eight of them. The put the ones they still had onto shelves with two on each shelf. How many shelves did they use?

4) A waiter had sixty-two customers in his section. If seventeen of them left and the rest of his tables had nine people at each table, how many tables did he have?

5) Faye was planting vegetables in her garden. She started with forty-seven seeds and planted thirty-nine of them in the big garden and in each of her small gardens put two seeds each. How many small gardens did Faye have?

6) Tom had thirty-six pieces of clothing to wash. He put eighteen of them in one load, but decided to split the rest into two equal loads. How many pieces of clothing could go in each of the small loads?

7) Amy uploaded twenty-two pictures to Facebook. She put four pics into one album and put the rest into two different albums. How many pictures were in each of the two albums?

8) Emily baked twenty cupcakes for her school's bake sale. If her brother, Todd, ate eight of them how many packages could she make if she put four cupcake in each package?

9) Mike had forty-three dollars. If he spent twenty-five bucks on a new game, how many nine dollar toys could he buy with the money he had left?

10) Maria picked forty-three flowers for her friend’s wedding. She was making bouquets with five flowers in each one. If twenty-three of the flowers wilted before the wedding, how many bouquets could she still make?
