Solve each problem.

1) A store had forty-three coloring books in stock. They ended up putting them on sale and getting rid of three of them. The put the ones they still had onto shelves with five on each shelf. How many shelves did they use?

2) George is at the library helping put away books. There are thirty books to put away total but a librarian takes six of them and leaves George with the rest. If he can fit four books on a shelf, how many shelves will he need?

3) A pet store had forty-five puppies. In one day they sold thirty-nine of them and put the rest into cages with two in each cage. How many cages did they use?

4) Edward made sixty-nine dollars mowing lawns over the summer. If he spent twenty dollars buying new mower blades, how many seven dollar games could he buy with the money he had left?

5) Faye picked eighty-eight flowers for her friend’s wedding. She was making bouquets with five flowers in each one. If forty-eight of the flowers wilted before the wedding, how many bouquets could she still make?

6) Tom bought sixty-three tickets at the state fair. He spent fourteen tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost seven tickets, how many rides could he go on?

7) Amy baked fifty cupcakes for her school’s bake sale. If her brother, Todd, ate five of them how many packages could she make if she put five cupcakes in each package?

8) Roger had sixty-three dollars. If he spent forty-eight bucks on a new game, how many three dollar toys could he buy with the money he had left?

9) Sarah had fifty-eight files on her computer. She deleted thirty-one of them and put the rest into folders with nine files in each one. How many folders did Sarah end up with?

10) For Halloween Maria received one hundred thirteen pieces of candy. She ate fifty pieces then placed the rest into piles with nine in each pile. How many piles could she make?
### Two Step Problems

Solve each problem.
