Solve each problem.

1) The cafeteria had seventy-five apples. For lunch they handed out forty-seven to students and decided to use the rest to make pies. If each pie takes four apples, how many pies could they make?

2) Paige uploaded seventy-four pictures to Facebook. She put forty-seven pics into one album and put the rest into nine different albums. How many pictures were in each of the nine albums?

3) There are thirteen students trying out for the school's trivia teams. If three of them didn't get picked for the team and the rest were put into two groups, how many students would be in each group?

4) Gwen's team won their baseball game and scored forty-two points total. If Gwen scored eighteen of the points and everyone else scored six points each, how many players were on her team?

5) A store had twenty-one coloring books in stock. They ended up putting them on sale and getting rid of seven of them. The put the ones they still had onto shelves with seven on each shelf. How many shelves did they use?

6) Tom bought forty-eight tickets at the state fair. He spent thirty-eight tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost five tickets, how many rides could he go on?

7) Amy had sixty-seven homework problems. She finished twenty-five of them but still had seven pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?

8) Roger made seventy dollars mowing lawns over the summer. If he spent fourteen dollars buying new mower blades, how many seven dollar games could he buy with the money he had left?

9) Mike had eighty-three pieces of clothing to wash. He put forty-one of them in one load, but decided to split the rest into six equal loads. How many pieces of clothing could go in each of the small loads?

10) Maria baked thirteen cupcakes for her school's bake sale. If her brother, Todd, ate nine of them how many packages could she make if she put two cupcake in each package?
