Solve each problem.

1) At the fair Adam bought 10 tickets. After riding the ferris wheel he had 3 tickets left. If each ticket cost 9 dollars, how much money did Adam spend riding the ferris wheel?

2) A worksheet had 7 problems on it. If a teacher had 17 worksheets to grade and had already graded 8 of them, how many more problems does she have to grade?

3) A trivia team had 9 members total, but during a game 3 members didn't show up. If each member that did show up scored 2 points, how many points were scored total?

4) Mike had 15 video games but 9 of them weren't working. If he wanted to sell the working games for $5 each, how much money could he earn?

5) Edward earned 9 dollars for each lawn he mowed. If he had 6 lawns to mow, but forgot to mow 2 of them, how much money did he actually earn?

6) At a restaurant each adult meal costs $2 and kids eat free. If a group of 9 people came in and 2 were kids, how much would it cost for the group to eat?

7) Chloe baked 7 brownies, but needed 16 total for her party. If she used 6 cups of flour on each one, how much cups of flour does she still need?

8) There were 8 friends playing a video game online when 3 players quit. If each player left had 3 lives, how many lives did they have total?

9) Sam invited 9 friends to a birthday party, but 6 couldn't come. If he wanted to buy enough cupcakes so each person could have exactly 2, how many should he buy?

10) Megan earned 8 points for each bag of cans she recycled. If she had 14 bags, but didn't recycle 5 of them, how many points would she have earned?
