Two Step Problems

Solve each problem.

1) A new building needed 14 windows. The builder had already installed 5 of them. If it takes 4 hours to install each window, how long will it take him to install the rest?

2) A chef needs to cook 16 potatoes. He has already cooked 7. If each potato takes 5 minutes to cook, how long will it take him to cook the rest?

3) Ned bought 14 boxes of chocolate candy and gave 7 to his little brother. If each box has 6 pieces inside it, how many pieces did Ned still have?

4) There were 11 friends playing a video game online when 5 players quit. If each player left had 5 lives, how many lives did they have total?

5) Henry earned 5 dollars for each lawn he mowed. If he had 12 lawns to mow, but forgot to mow 7 of them, how much money did he actually earn?

6) A trivia team had 5 members total, but during a game 2 members didn't show up. If each member that did show up scored 6 points, how many points were scored total?

7) A painter needed to paint 10 rooms in a building. Each room takes 8 hours to paint. If he already painted 8 rooms, how much longer will he take to paint the rest?

8) In a video game, each enemy defeated gives you 3 points. If a level has 6 enemies total and you destroy all but 2 of them, how many points would you earn?

9) Wendy earned 5 points for each bag of cans she recycled. If she had 11 bags, but didn't recycle 2 of them, how many points would she have earned?

10) Each chocolate bar in a box cost $3. If a box had 7 bars total and Olivia sold all but 4 bars, how much money would she have made?
