When adding or subtracting time, it is often easier to round to the next hour first. In the example below we can round 1 hour and 55 minutes up to 2 hours (5 minutes more).

\[
6:25 + 1 \text{ hour and 55 minutes} = 6:25 + 2 \text{ hours} = 8:25
\]

When rounded to 2 hours, we can easily see that 6:25 + 2 hours is 8:25. But since we added 5 minutes, now we must take away 5 minutes.

\[
8:25 - 5 \text{ minutes} = 8:20
\]

And now we know the elapsed time!

Ex) \[7:45 + 1 \text{ hour and 55 minutes} = \boxed{9:35}\]

1) \[5:50 + 2 \text{ hours and 55 minutes} = \boxed{8:45}\]

2) \[7:40 + 1 \text{ hour and 55 minutes} = \boxed{8:20}\]

3) \[5:25 + 2 \text{ hours and 55 minutes} = \boxed{8:20}\]

4) \[7:25 + 1 \text{ hour and 55 minutes} = \boxed{8:20}\]

5) \[7:40 + 3 \text{ hours and 50 minutes} = \boxed{8:30}\]

6) \[5:35 + 2 \text{ hours and 55 minutes} = \boxed{8:30}\]

7) \[2:15 + 1 \text{ hour and 55 minutes} = \boxed{4:10}\]

8) \[7:00 + 2 \text{ hours and 50 minutes} = \boxed{9:50}\]

9) \[4:55 + 1 \text{ hour and 50 minutes} = \boxed{6:45}\]

10) \[3:25 + 2 \text{ hours and 55 minutes} = \boxed{6:20}\]

11) \[6:25 - 3 \text{ hours and 55 minutes} = \boxed{2:30}\]

12) \[7:25 - 1 \text{ hour and 55 minutes} = \boxed{6:20}\]

13) \[7:30 - 3 \text{ hours and 50 minutes} = \boxed{4:30}\]

14) \[10:10 - 3 \text{ hours and 55 minutes} = \boxed{6:25}\]

15) \[8:05 - 2 \text{ hours and 50 minutes} = \boxed{5:05}\]

16) \[7:00 - 3 \text{ hours and 50 minutes} = \boxed{5:00}\]

17) \[7:40 - 1 \text{ hour and 50 minutes} = \boxed{6:40}\]

18) \[4:50 - 3 \text{ hours and 50 minutes} = \boxed{4:50}\]

19) \[6:20 - 2 \text{ hours and 55 minutes} = \boxed{4:25}\]

20) \[10:30 - 3 \text{ hours and 55 minutes} = \boxed{8:20}\]
When adding or subtracting time, it is often easier to round to the next hour first. In the example below we can round 1 hour and 55 minutes up to 2 hours (5 minutes more).

\[ 6:25 + 1 \text{ hours and 55 minutes} = 8:20 \]

And now we know the elapsed time!
