

**Determine which choice shows the expression used to solve the problem.****Answers**

- 1) For Olivia's birthday two of her friends gave her five dollars. How much money did she get for her birthday?  
A.  $2 + 5$                       B.  $5 - 2$                       C.  $2 \times 5$                       D.  $5 \div 2$
- 2) Ned had to sell boxes of candy. He started out with fifteen boxes and then sold eight. How many boxes did he have left?  
A.  $15 + 8$                       B.  $15 - 8$                       C.  $15 \times 8$                       D.  $15 \div 8$
- 3) There are thirty-six people attending a luncheon. If a table can hold nine people, how many tables do they need?  
A.  $36 + 9$                       B.  $36 - 9$                       C.  $36 \times 9$                       D.  $36 \div 9$
- 4) Nancy is making bead necklaces for her friends. She has eight beads and each necklace takes two beads. How many necklaces can Nancy make?  
A.  $8 + 2$                       B.  $8 - 2$                       C.  $8 \times 2$                       D.  $8 \div 2$
- 5) Maria was collecting cans for recycling. On Monday she had four bags of cans. The next day she found nine more bags worth. How many bags did she have total?  
A.  $4 + 9$                       B.  $9 - 4$                       C.  $4 \times 9$                       D.  $9 \div 4$
- 6) Mike was reading through his favorite book series. He had twenty-seven books to read total. If he read three books each week, how many weeks would it take him to finish the series?  
A.  $27 + 3$                       B.  $27 - 3$                       C.  $27 \times 3$                       D.  $27 \div 3$
- 7) The roller coaster at the state fair costs six tickets per ride. If five friends were going to ride the roller coaster, how many tickets would they need?  
A.  $6 + 5$                       B.  $6 - 5$                       C.  $6 \times 5$                       D.  $6 \div 5$
- 8) Victor was reading through his favorite book series. Each week he read five different books. How many books would he have read through after six weeks?  
A.  $5 + 6$                       B.  $6 - 5$                       C.  $5 \times 6$                       D.  $6 \div 5$
- 9) John was making ice using ice trays. He originally had seven ice cubes. But made two more cubes. How many ice cubes did he have total?  
A.  $7 + 2$                       B.  $7 - 2$                       C.  $7 \times 2$                       D.  $7 \div 2$
- 10) Katie was helping her mom plant flowers and together they planted thirty-six seeds. If they put four seeds in each flower bed, how many flower beds did they have?  
A.  $36 + 4$                       B.  $36 - 4$                       C.  $36 \times 4$                       D.  $36 \div 4$
