

Solve each problem.

Answers

- 1) On the home screen of Tiffany's tablet she had 9 rows of apps with 9 apps on each row. If she deleted 12 apps, how many would she have left on her home screen?
- 2) Victor was selling drawings for \$5 each. For every 6 drawings he sold, he had to use \$6 in art supplies to make them. How much profit would he make if he sold 6 drawings?
- 3) A chef bought 7 bags of apples for \$30. Each bag had 10 apples, but he had to throw away 6 apples because they were rotten. How many good apples did the chef end up with?
- 4) A pet store kept their hamsters in cages with 9 per cage. For their Christmas sale they put out 8 cages and end up selling all but 7 hamsters. How many hamsters did they sell during their Christmas sale?
- 5) For a grocery store's 100 year anniversary sale they ordered 9 crates of grapes with each crate containing 10 bags of grapes. After the anniversary sale they had sold all but 2 bags. How many bags of grapes did they sell during the anniversary?
- 6) At the book store they were offering a deal where you get \$8 off when you purchase 9 books. If Faye bought 9 books and each book cost \$9, how much would her final price be?
- 7) To earn some extra money Amy started selling handmade bracelets. She spent 3 dollars on supplies and began selling them for \$1 each. She sold 9 before running out of supplies. How much of what she earned was profit?
- 8) For the science fair Robin wanted to see how many minutes of videos she watched were ads. She watched 8 videos with each video lasting 9 minutes. After watching the videos she calculated that she had watched 2 minutes of ads over all the videos. How many minutes were not ads?
