

Daddy long legs spiders, or 'Harvestmen', are not your typical spiders, they're cool and unique in their own way! With their long, skinny legs and tiny bodies, they look like they just walked out of a fun, wacky cartoon. But don't be fooled by their appearance, these spiders are real and they're expert survivors in the wild. Sure, they might seem a bit scary at first, but they're actually harmless and quite interesting to learn about.

Speaking of being interesting, you might be curious about what these cartoonish spiders eat. They're not picky eaters at all and will munch on a variety of things like insects, plant material, and even bird droppings! They use their long legs to catch their prey and their tiny jaws to munch on their food. So, they're not only funny looking, but they're also unique in their dining habits.

Now that we've talked about their eating habits, let's shift our attention to where these long-legged spiders live. They can be found in many places around the world, from forests and fields to your own backyard! They prefer damp, shaded areas and you'll usually find them hiding under rocks, leaves, and logs during the day. At night, they come out to hunt for food and to socialize with other daddy long legs.

Just like us humans, daddy long legs have their own way of protecting themselves from danger. When threatened, they shake their bodies in a motion called 'bobbing', which confuses their predators. And guess what? Unlike many other spiders, they don't have venom or silk webs to catch their prey. So, as you can see, daddy long legs are not just unique in appearance but also in their behaviors and characteristics.

So, next time you see a daddy long legs, remember that they're not only unique and cool-looking but also harmless and interesting creatures.

Solve each problem.

Use the article to answer the question.

- 1) What do daddy long legs spiders look like?
 - A. No legs and slimy bodies
 - B. Long, skinny legs and tiny bodies
 - C. Short, stubby legs and big bodies
 - D. Wide, flat bodies and medium-sized legs
- 2) Are daddy long legs spiders harmful to humans?
 - A. Yes, they're dangerous
 - B. It depends on the type of daddy long legs
 - C. No, they're harmless
 - D. They're only harmful during winter
- 3) Where do daddy long legs spiders hide during the day?
 - A. In bushes.
 - B. In the ground.
 - C. In trees.
 - D. Under rocks, leaves, and logs.
- 4) Do daddy long legs spiders have venom or silk webs?
 - A. Yes, they have venom and silk webs.
 - B. No, they don't have venom or silk webs to catch their prey.
 - C. Yes, they have silk webs but no venom.
 - D. Yes, they have venom but no silk webs.
- 5) What are daddy long legs spiders also known as?
 - A. Black widows
 - B. Harvestmen
 - C. Tarantulas
 - D. Jumping spiders
- 6) How do daddy long legs spiders catch their prey?
 - A. They use their venom.
 - B. They use their long legs.
 - C. They use their web.
 - D. They use their tiny jaws.
- 7) How do daddy long legs spiders protect themselves from danger?
 - A. They hide in their web.
 - B. They shake their bodies.
 - C. They bite their predators.
 - D. They run away.
- 8) Do Daddy long legs prefer bright areas or shaded areas?
 - A. Bright areas
 - B. They do not have a preference
 - C. Shaded areas
 - D. They like both
- 9) When do daddy long legs usually come out of their hiding places?
 - A. At dawn
 - B. At dawn and dusk
 - C. At night
 - D. In the afternoon
- 10) What motion do daddy long legs make when they are threatened?
 - A. 'Spinning'
 - B. 'Skipping'
 - C. 'Bobbing'
 - D. 'Jumping'

- 11) What do daddy long legs spiders eat?
- | | |
|---|------------------|
| A. Insects | B. Plants |
| C. Insects, plant material, and even bird droppings | D. Large mammals |

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 12) "I love to sunbathe in hot, dry areas."
- 13) "I use my venom to protect myself from predators."
- 14) "My menu is quite diverse. I'll eat insects or plants... I am not picky!"
- 15) "I'm a carnivore and only eat insects."
- 16) "My body is as long as my legs."
- 17) "I hate coming out at night."
- 18) "You might find it strange, but, yes, I do eat bird droppings when I have the chance."
- 19) "I'm a night owl! I'll hide during the day and come out to hunt and socialize when it's dark."
- 20) "Despite my scary appearance, I assure you, I'm actually harmless."
- 21) "I scare away predators by producing sound."
- 22) "When threatened, I freeze and don't move."
- 23) "I've got short legs."
- 24) "I use my incredibly long legs to not only move around but also to capture my prey."
- 25) "I use my silk web to catch my prey."
- 26) "Even without venom or silk webs like many other spiders have, I still manage to catch my prey and survive in the wild."
- 27) "I blend in really well during the day, keeping myself hidden under rocks, leaves, and logs."
- 28) "If you find me it'll probably be somewhere that is damp and shady."
- 29) "I am a very picky eater."
- 30) "Even though my body is tiny, my long, skinny legs allow me to move about with ease!"
- 31) "When I sense danger, I start shaking my body in a special motion called 'bobbing'. It helps me confuse and escape from predators."

Determine if the statement is a fact or opinion based on the information in the article.

- 32) Daddy long legs spiders protect themselves by shaking their bodies, a motion known as bobbing.
- 33) Daddy long legs spiders look like they just came out of a silly cartoon.
- 34) Daddy long legs spiders prefer to live in damp, shaded areas.
- 35) The most amazing thing about daddy long legs is how they eat such a variety of things for such a small spider.
- 36) Daddy long legs spiders, also known as Harvestmen, are not truly spiders.

- 58) Be gentle with daddy long legs spiders.
- 59) Are daddy long legs spiders harmful to humans?
- 60) I can't believe how many different habitats daddy long legs spiders can live in!
- 61) These spiders like to live in cool, damp places.
- 62) What are daddy long legs spiders also known as?
- 63) Daddy long legs spiders do not have venomous fangs.
- 64) Where can you commonly find daddy long legs spiders?
- 65) Daddy long legs spiders help keep other insect populations in check.
- 66) List two types of food that daddy long legs spiders eat.
- 67) Wow, daddy long legs spiders have such long and skinny legs!
- 68) Look how long the legs are on a daddy long legs spider.

Determine which choice is the conclusion that can be drawn from the statement.

- 69) Daddy long legs spiders are non-venomous and defend themselves with a smell they produce. What can you say about daddy long legs based on this?
- A. Daddy long legs can harm humans. B. Daddy long legs do not have venom glands.
- C. Daddy long legs rely only on camouflage for protection. D. Daddy long legs are venomous creatures.
- 70) Daddy long legs have one round body part, unlike spiders which have two. What does this suggest about daddy long legs?
- A. Daddy long legs are physically different from spiders. B. Daddy long legs have fewer legs than spiders.
- C. Daddy long legs are a type of insect. D. Daddy long legs can change their body shape.
- 71) Many species of daddy long legs spiders are nocturnal, meaning they are most active during the night. What conclusion can be drawn from this fact?
- A. Daddy long legs spiders are blind. B. Daddy long legs spiders eat sleeping animals.
- C. Daddy long legs spiders hibernate during the night. D. Daddy long legs are not very active during the day.
- 72) Many spiders have silk glands which are used to make webs. Daddy long legs don't have silk glands. Based on this fact, what can be set about daddy long legs?
- A. Daddy long legs are larger than spiders. B. Daddy long legs eat the same food as spiders.
- C. Daddy long legs can run faster than other spiders. D. Daddy long legs can't create webs.

- 73) Daddy long legs spiders do not have venomous fangs and are not aggressive. What conclusion can be drawn about their relationship to humans?
- A. They are not harmful to humans.
 - B. They are extremely dangerous to humans.
 - C. Daddy long leg spiders don't have a mouth.
 - D. Humans should be scared of daddy long leg spiders.
