

Determine the number that will correctly balance each equation.

Answers

1) $34 - 10 = 34 - \underline{\hspace{2cm}}$

2) $58 - 24 = \underline{\hspace{2cm}} - 11$

1. _____

2. _____

3) $35 + \underline{\hspace{2cm}} = 63 - 5$

4) $44 + 20 = 1 + \underline{\hspace{2cm}}$

3. _____

4. _____

5) $\underline{\hspace{2cm}} + 47 + 13 = 31 + 76$

6) $25 + 86 = \underline{\hspace{2cm}} + 49 + 50$

5. _____

6. _____

7) $95 - 8 = \underline{\hspace{2cm}} + 42$

8) $90 - \underline{\hspace{2cm}} = 44 + 17$

7. _____

8. _____

9) $\underline{\hspace{2cm}} - 34 = 49 + 30 + 46$

10) $32 + 21 = \underline{\hspace{2cm}} + 48$

9. _____

10. _____

11. _____

11) $\underline{\hspace{2cm}} - 42 = 12 - 2$

12) $3 + \underline{\hspace{2cm}} = 32 + 16$

12. _____

13. _____

14. _____

13) $2 + 4 + \underline{\hspace{2cm}} = 35 - 12$

14) $37 + 38 = \underline{\hspace{2cm}} + 31 + 28$

Determine the number that will correctly balance each equation.

1) $34 - 10 = 34 - \underline{10}$

2) $58 - 24 = \underline{45} - 11$

3) $35 + \underline{23} = 63 - 5$

4) $44 + 20 = 1 + \underline{63}$

5) $\underline{47} + 47 + 13 = 31 + 76$

6) $25 + 86 = \underline{12} + 49 + 50$

7) $95 - 8 = \underline{45} + 42$

8) $90 - \underline{29} = 44 + 17$

9) $\underline{159} - 34 = 49 + 30 + 46$

10) $32 + 21 = \underline{5} + 48$

11) $\underline{52} - 42 = 12 - 2$

12) $3 + \underline{45} = 32 + 16$

13) $2 + 4 + \underline{17} = 35 - 12$

14) $37 + 38 = \underline{16} + 31 + 28$
