

Use addition strategies with place value to solve.

Answers

Ex) $42 + 335 = 377$

2 +	5 =	7
40 +	30 =	70
0 +	300 =	300
		377

1) $936 - 551 = \underline{385}$

$6 - 1 = 5$

$30 - 50 = -20$

$900 - 500 = \underline{400}$

385

2) $685 - 380 = 305$

5	-	0	=	5
80	-	80	=	0
600	-	300	=	300
				<u>305</u>

3) $793 - 484 = \underline{309}$

$3 - 4 = -1$

$90 - 80 = 10$

$700 - 400 = \underline{300}$

309

4) $688 - 448 = 240$

8 - 8 =	0
80 - 40 =	40
600 - 400 =	200
	240

5) $530 + 151 = \underline{681}$

$0 + 1 = 1$

$30 + 50 = 80$

$500 + 100 = \underline{600}$

$\quad\quad\quad 681$

6) $13 + 545 = 558$

3 +	5 =	8
10 +	40 =	50
0 +	500 =	500
		<u>558</u>

7) $171 + 491 =$ 662

$1 + 1 = 2$

$70 + 90 = 160$

$100 + 400 =$ 500

662

8) $990 - 872 =$ 118
 $0 - 2 =$ -2
 $90 - 70 =$ 20
 $900 - 800 =$ 100
118

9) $502 - 275 = \underline{227}$

$2 - 5 = -3$

$0 - 70 = -70$

$500 - 200 = \underline{300}$

227

10) $171 + 263 = 434$

1	+	3	=	4
70	+	60	=	130
100	+	200	=	300
				434

11) $509 - 258 = \underline{251}$

$9 - 8 = 1$

$0 - 50 = -50$

$500 - 200 = \underline{300}$

251

Ex. 377

1. **385**

2. **305**3. **309**

4. **240**

5. **681**

6. **558**

7. **662**8. **118**

9. 227

10. **434**

11. **251**
