

**Use addition strategies with place value to solve.**

## Answers

Ex)  $909 - 726 = 183$   
 $9 - 6 = 3$   
 $0 - 20 = -20$   
 $900 - 700 = 200$   
183

1)  $357 + 284 = 641$

|             |           |
|-------------|-----------|
| 7 + 4 =     | 11        |
| 50 + 80 =   | 130       |
| 300 + 200 = | 500       |
|             | <hr/> 641 |

2)  $35 + 629 = 664$

|           |           |
|-----------|-----------|
| 5 + 9 =   | 14        |
| 30 + 20 = | 50        |
| 0 + 600 = | 600       |
|           | <hr/> 664 |

3)  $950 - 733 = \underline{217}$

$0 - 3 = -3$

$50 - 30 = 20$

$900 - 700 = \underline{200}$

$\quad\quad\quad 217$

4)  $574 - 379 = 195$

|       |       |           |
|-------|-------|-----------|
| 4 -   | 9 =   | -5        |
| 70 -  | 70 =  | 0         |
| 500 - | 300 = | 200       |
|       |       | <hr/> 195 |

5)  $892 - 884 =$  8  
 $2 - 4 =$  -2  
 $90 - 80 =$  10  
 $800 - 800 =$  0  
8

6)  $86 + 643 = 729$

|           |           |
|-----------|-----------|
| 6 + 3 =   | 9         |
| 80 + 40 = | 120       |
| 0 + 600 = | 600       |
|           | <hr/> 729 |

7)  $476 + 520 = 996$

|       |       |       |
|-------|-------|-------|
| 6 +   | 0 =   | 6     |
| 70 +  | 20 =  | 90    |
| 400 + | 500 = | 900   |
|       |       | <hr/> |
|       |       | 996   |

8)  $240 + 128 = \underline{368}$

$0 + 8 = 8$

$40 + 20 = 60$

$200 + 100 = \underline{300}$

$\quad\quad\quad 368$

9)  $953 - 860 = \underline{93}$

$3 - 0 = 3$

$50 - 60 = -10$

$900 - 800 = \underline{100}$

$93$

**10)**  $117 + 233 = \underline{350}$

$7 + 3 = 10$

$10 + 30 = 40$

$100 + 200 = \underline{300}$

$350$

**11)**  $118 + 497 = \underline{615}$

$8 + 7 = 15$

$10 + 90 = 100$

$100 + 400 = \underline{500}$

$\phantom{100 + 400 = } 615$

Ex. 183

1. **641**

2. **664**

3. 217

4. 195

5. **8**

6. **729**

7. **996**

8. **368**

9. **93**

10. **350**

11. **615**
