

Use addition strategies with place value to solve.

Answers

Ex) $842 + 132 = 974$

1) $608 - 500 =$ _____

$$2 + 2 = 4$$

Ex. 974

$$40 + 30 = 70$$

$$800 + 100 = 900$$

974

2) $566 - 403 =$ _____

3) $585 - 429 =$ _____

4) $51 + 611 =$ _____

5) $447 + 543 =$ _____

6) $648 - 512 =$ _____

7) $506 + 408 =$ _____

8) $592 + 301 =$

9) $392 - 252 =$

10) $77 + 267 =$

11) $738 - 453 =$

Use addition strategies with place value to solve.

Answers

Ex) $842 + 132 = \underline{974}$
 $2 + 2 = 4$
 $40 + 30 = 70$
 $800 + 100 = \underline{900}$
 974

1) $608 - 500 = 108$

8	-	0	=	8
0	-	0	=	0
600	-	500	=	100
				108

$$\begin{array}{r} 2) \quad 566 - 403 = \underline{163} \\ \quad 6 - 3 = \quad 3 \\ \quad 60 - 0 = \quad 60 \\ \quad 500 - 400 = \underline{100} \\ \quad \quad \quad 163 \end{array}$$

3) $585 - 429 = 156$

5	-	9	=	-4
80	-	20	=	60
500	-	400	=	100
				156

4) $51 + 611 = 662$

1 + 1 =	2
50 + 10 =	60
0 + 600 =	600
	662

5) $447 + 543 = 990$

7 +	3 =	10
40 +	40 =	80
400 +	500 =	900
		990

6) $648 - 512 = 136$
 $8 - 2 = 6$
 $40 - 10 = 30$
 $600 - 500 = 100$
136

7) $506 + 408 = 914$

6 +	8 =	14
0 +	0 =	0
500 + 400 =	900	
	914	

8) $592 + 301 = 893$

2 +	1 =	3
90 +	0 =	90
500 + 300 =	800	
	<u>893</u>	

9) $392 - 252 = \underline{140}$
 $2 - 2 = 0$
 $90 - 50 = 40$
 $300 - 200 = \underline{100}$
 140

10) $77 + 267 = \underline{344}$

$7 + 7 = 14$

$70 + 60 = 130$

$0 + 200 = \underline{200}$

$\underline{344}$

11) $738 - 453 = \underline{285}$

$8 - 3 = 5$

$30 - 50 = -20$

$700 - 400 = \underline{300}$

285

Ex. 974

1. **108**

2. **163**

3. **156**

4. **662**

5. **990**

6. **136**

7. 914

8. **893**

9. **140**

10. **344**

11. **285**
