Adding Money (Vertical)

Name:

Solve each problem.

1) Adam found some trading cards at the thrift store. The total price for them was $0.69. If he gives the cashier $1, how much will he get back? What is the fewest number of quarters, dimes, nickels and pennies will he receive?

2) George bought some stickers from Robin. Robin asked $0.55 for the stickers and George gave her $1. How much does Robin need to give him back? What is the fewest number of quarters, dimes, nickels and pennies will George receive?

3) Rachel had a library fine of $0.12. She paid for the fine with $1. How much will she get back? What is the fewest number of quarters, dimes, nickels and pennies will she get?

4) A packet of drink flavoring cost $0.13. Dave bought a packet and gave the cashier $1. How much will he get back? What is the fewest number of quarters, dimes, nickels and pennies would you receive?

5) Oliver bought $0.51 worth of candy. He gave the cashier $1. How much should he get back? What is the fewest number of quarters, dimes, nickels and pennies he would receive?

6) Vanessa's dad bought $0.09 worth of nails. He gave the cashier $1. How much will he get back? What is the fewest number of quarters, dimes, nickels and pennies he will receive?

7) The school store was having a sale on erasers. 59 erasers for $0.59. Lana bought 59 and paid with $1. How much will she get back? What is the fewest number of quarters, dimes, nickels and pennies will she receive?

8) Mike bought a bookmark at the bookfair. It cost him $0.54. If he gives the cashier $1, how much will he get back? What is the fewest number of quarters, dimes, nickels and pennies he would receive?

9) If you bought an item that cost $0.32 and gave the cashier $1, how much will you get back? What is the fewest number of quarters, dimes, nickels and pennies you would receive?

10) Gwen bought a toy that cost $0.92. She gave the cashier $1. How much should she get back? What is the fewest number of quarters, dimes, nickels and pennies she would receive?

11) At an office supplies store you can buy a bag of rubber bands for $0.23. If you give the cashier $1, how much will you get back? What is the fewest number of quarters, dimes, nickels and pennies would you receive?

12) A packet of drink flavoring cost $0.88. Luke bought a packet and gave the cashier $1. How much will he get back? What is the fewest number of quarters, dimes, nickels and pennies would you receive?

13) Edward bought $0.52 worth of candy. He gave the cashier $1. How much should he get back? What is the fewest number of quarters, dimes, nickels and pennies he would receive?

14) At an office supplies store you can buy a bag of rubber bands for $0.08. If you give the cashier $1, how much will you get back? What is the fewest number of quarters, dimes, nickels and pennies would you receive?

15) Haley's dad bought $0.18 worth of nails. He gave the cashier $1. How much will he get back? What is the fewest number of quarters, dimes, nickels and pennies he will receive?
