Adding and Subtracting Decimals

Name: _____

Solve each problem.

1) George weighed the candy he and his brother got from Halloween. Together they received 7.75 kgs of candy. If George's amount was 2.95 kg how much was his brothers?

2) During a science experiment, Mary found the mass of two rocks to be 40.56 grams and 51.4 grams. What is the total mass of these two rocks?

3) Victor ate a snack with 72.27 total calories. If the chips he ate were 41.67 calories, how many calories were in the rest of his snack?

4) A weatherman was measuring the amount of rain two cities received over a week. City A received 5.20 inches while City B received 7.8 inches. How much rain did they get total?

5) Henry and Faye were running a relay race. The race was 20.9 kilometers total. If Henry ran 15.80 kilometers how far did Faye run?

6) Jerry was training for a marathon. On his first day he ran 3.3 kilometers. On the second day he ran 2.4 kilometers. How far did he run altogether?

7) Vanessa downloaded two apps which were 13.09 kb total. If one app was 5.29 kb, how big was the other app?

8) Mike was making some brownies and cupcakes for his school fundraiser. If the brownies needed 1.93 cups of sugar and the cupcakes needed 3.4 cups, how much sugar would he need altogether?

9) Cody was checking how much power his lights used. His first light by itself used 95.26 amps. When he turned on the second light, together they used 168.46 amps. How many amps did just the second light use?

10) A computer programmer had two files. The first was 47.26 gigabyes and the second was 30.2 gigabytes. What is the total file size of both?

Answers
1. _____
2. _____
3. _____
4. _____

Solve each problem.

1) George weighed the candy he and his brother got from Halloween. Together they received 7.75 kgs of candy. If George's amount was 2.95 kg how much was his brothers?

1. **4.8**

2. **91.96**

2) During a science experiment, Mary found the mass of two rocks to be 40.56 grams and 51.4 grams. What is the total mass of these two rocks?

3. **30.6**

4. **13**

3) Victor ate a snack with 72.27 total calories. If the chips he ate were 41.67 calories, how many calories were in the rest of his snack?

5. **5.1**

6. **5.7**

4) A weatherman was measuring the amount of rain two cities received over a week. City A received 5.20 inches while City B received 7.8 inches. How much rain did they get total?

7. **7.8**

8. **5.33**

5) Henry and Faye were running a relay race. The race was 20.9 kilometers total. If Henry ran 15.80 kilometers how far did Faye run?

9. **73.2**

10. **77.46**

6) Jerry was training for a marathon. On his first day he ran 3.3 kilometers. On the second day he ran 2.4 kilometers. How far did he run altogether?
