

**Solve each problem.****Answers**

- 1) A movie store had one hundred nineteen movies they were putting on eight shelves. If the owner wanted to make sure each shelf had the same number of movies how many more movies would he need?
- 2) There are one hundred thirty-seven students going to a trivia competition. If each school van can hold six students, how many vans will they need?
- 3) A baker had five boxes for donuts. He ended up making seven hundred seventy-eight donuts and splitting them evenly between the boxes. How many extra donuts did he end up with?
- 4) A clown needed three hundred twenty-four balloons for a party he was going to, but the balloons only came in packs of five. How many packs of balloons would he need to buy?
- 5) Adam was trying to beat his old score of seven hundred twenty-one points in a video game. If he scores exactly three points each round, how many rounds would he need to play to beat his old score?
- 6) Olivia had nine hundred forty-five songs on her mp3 player. If she wanted to put the songs equally into four different playlists, how many songs would she have left over?
- 7) Maria had seven hundred seventy-three pennies. She wanted to place the pennies into two stacks, with the same amount in each stack. How many more pennies would she need so all the stacks would be equal?
- 8) A box can hold six brownies. If a baker made five hundred sixty-eight brownies, how many full boxes of brownies did he make?
- 9) It takes seven grams of plastic to make a ruler. If a company had six hundred fifty-six grams of plastic, how many entire rulers could they make?
- 10) Haley had saved up five hundred ninety quarters and decided to spend them on sodas. If it costs eight quarters for each soda from a soda machine, how many more quarters would she need to buy the final soda?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

10. _____

**Solve each problem.**

- 1) A movie store had one hundred nineteen movies they were putting on eight shelves. If the owner wanted to make sure each shelf had the same number of movies how many more movies would he need? $119 \div 8 = 14 \text{ r}7$
- 2) There are one hundred thirty-seven students going to a trivia competition. If each school van can hold six students, how many vans will they need? $137 \div 6 = 22 \text{ r}5$
- 3) A baker had five boxes for donuts. He ended up making seven hundred seventy-eight donuts and splitting them evenly between the boxes. How many extra donuts did he end up with? $778 \div 5 = 155 \text{ r}3$
- 4) A clown needed three hundred twenty-four balloons for a party he was going to, but the balloons only came in packs of five. How many packs of balloons would he need to buy? $324 \div 5 = 64 \text{ r}4$
- 5) Adam was trying to beat his old score of seven hundred twenty-one points in a video game. If he scores exactly three points each round, how many rounds would he need to play to beat his old score? $721 \div 3 = 240 \text{ r}1$
- 6) Olivia had nine hundred forty-five songs on her mp3 player. If she wanted to put the songs equally into four different playlists, how many songs would she have left over? $945 \div 4 = 236 \text{ r}1$
- 7) Maria had seven hundred seventy-three pennies. She wanted to place the pennies into two stacks, with the same amount in each stack. How many more pennies would she need so all the stacks would be equal? $773 \div 2 = 386 \text{ r}1$
- 8) A box can hold six brownies. If a baker made five hundred sixty-eight brownies, how many full boxes of brownies did he make? $568 \div 6 = 94 \text{ r}4$
- 9) It takes seven grams of plastic to make a ruler. If a company had six hundred fifty-six grams of plastic, how many entire rulers could they make? $656 \div 7 = 93 \text{ r}5$
- 10) Haley had saved up five hundred ninety quarters and decided to spend them on sodas. If it costs eight quarters for each soda from a soda machine, how many more quarters would she need to buy the final soda? $590 \div 8 = 73 \text{ r}6$
