

Solve each problem.

1) $\frac{2}{6} - \frac{1}{10} =$

2) $\frac{3}{6} + \frac{1}{3} =$

**Answers**

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

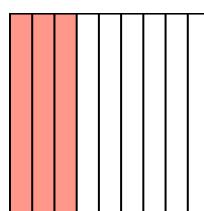

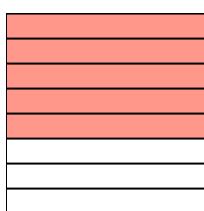

7. _____

8. _____

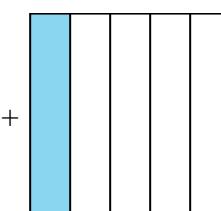

9. _____

10. _____

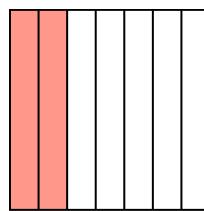

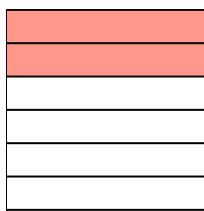

3) $\frac{5}{8} - \frac{3}{9} =$

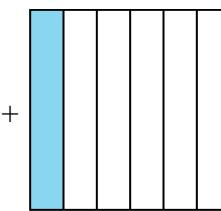

4) $\frac{4}{6} + \frac{1}{5} =$

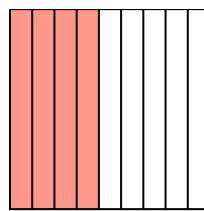

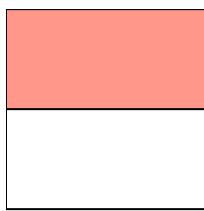

5) $\frac{2}{6} - \frac{2}{7} =$

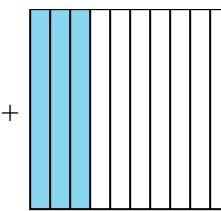

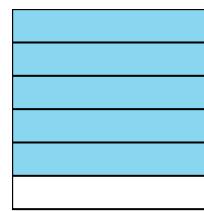

6) $\frac{8}{9} + \frac{1}{6} =$

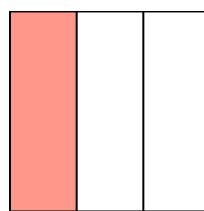

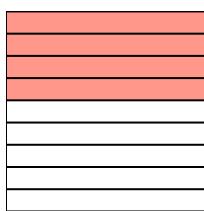

7) $\frac{1}{2} - \frac{4}{9} =$

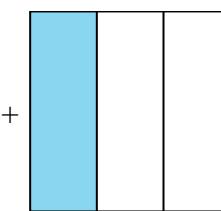

8) $\frac{5}{6} + \frac{3}{10} =$

9) $\frac{4}{9} - \frac{1}{3} =$

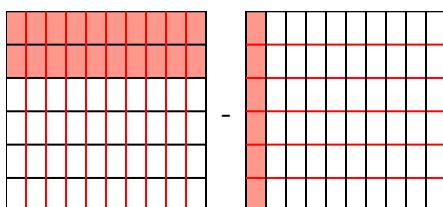

10) $\frac{2}{4} + \frac{1}{3} =$

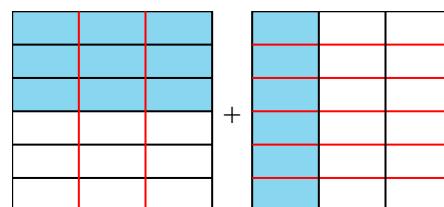

Solve each problem.

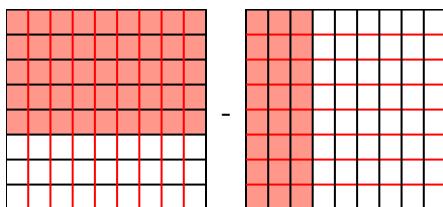

1) $\frac{2}{6} - \frac{1}{10} = \frac{10}{30} - \frac{3}{30} = \frac{7}{30}$

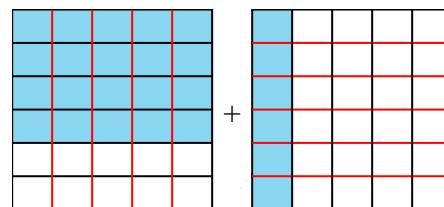

2) $\frac{3}{6} + \frac{1}{3} = \frac{3}{6} + \frac{2}{6} = \frac{5}{6}$

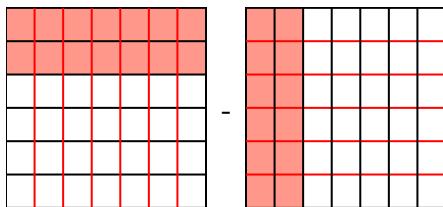

3) $\frac{5}{8} - \frac{3}{9} = \frac{45}{72} - \frac{24}{72} = \frac{21}{72}$

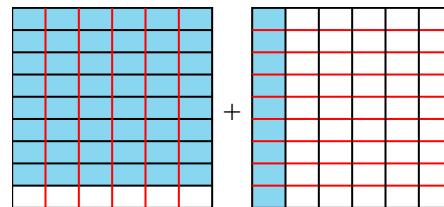

4) $\frac{4}{6} + \frac{1}{5} = \frac{20}{30} + \frac{6}{30} = \frac{26}{30}$

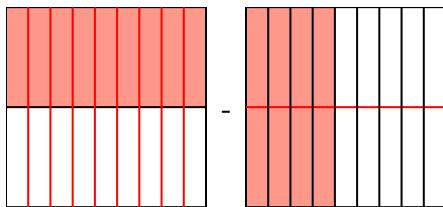

5) $\frac{2}{6} - \frac{2}{7} = \frac{14}{42} - \frac{12}{42} = \frac{2}{42}$

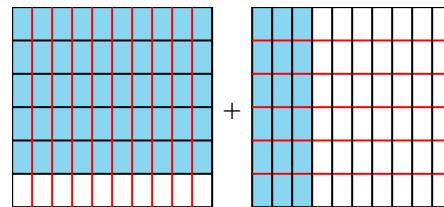

6) $\frac{8}{9} + \frac{1}{6} = \frac{16}{18} + \frac{3}{18} = 1\frac{1}{18}$

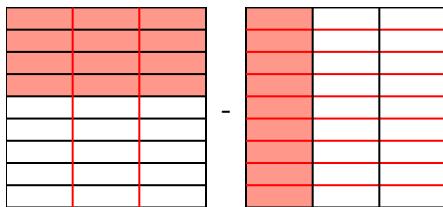

7) $\frac{1}{2} - \frac{4}{9} = \frac{9}{18} - \frac{8}{18} = \frac{1}{18}$

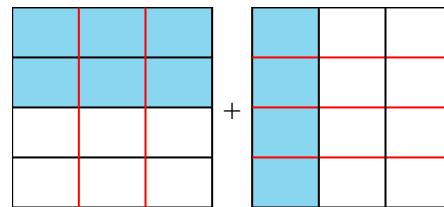

8) $\frac{5}{6} + \frac{3}{10} = \frac{25}{30} + \frac{9}{30} = 1\frac{4}{30}$

9) $\frac{4}{9} - \frac{1}{3} = \frac{4}{9} - \frac{3}{9} = \frac{1}{9}$

10) $\frac{2}{4} + \frac{1}{3} = \frac{6}{12} + \frac{4}{12} = \frac{10}{12}$

**Answers**

1. $\frac{7}{30}$
2. $\frac{5}{6}$
3. $\frac{21}{72}$
4. $\frac{26}{30}$
5. $\frac{2}{42}$
6. $1\frac{1}{18}$
7. $\frac{1}{18}$
8. $1\frac{4}{30}$
9. $\frac{1}{9}$
10. $\frac{10}{12}$
