Solve each problem.

1) Two contractors are bidding on building a house. Contractor A's price is represented in the table below. Contractor B's price is represented by an equation, with y representing the total price and x representing the square feet of the house.

| Contractor A | | |
|----------------|------------------|--|
| Square Feet | Total Price (\$) | |
| 1315 | 144,650 | |
| 1795 | 197,450 | |

Contractor B y = 126x

| A | | ~ | | _ | | ~ |
|---|---|---|---|---|---|---|
| A | п | S | W | e | r | S |

1. _____

2.

3.

Find the total price you'd get from building a 1,821 sq/ft house from the cheapest contractor.

2) Two companies are selling sugar by the pound. The cost of sugar for Company A is represented in the table below, while the cost for Company B is represented by an equation, with y representing the total cost in dollars for x pounds of sugar.

| Company A | | | |
|-----------------|--------------------|--|--|
| Total Pounds | Total Cost (\$) | | |
| 14 | 4.06 | | |
| 12 | 3.48 | | |

Company B
$$y = 0.29x$$

Find the total cost in dollars of buying 19 pounds of sugar from the more expensive company.

3) Two companies are selling electricity by Kilo-watt hour. The cost of electricity for Company A is represented in the table below, while the cost for Company B is represented by an equation, with y representing the total cost in dollars for x kilowatt hours.

| Company A | | |
|--------------------------|-----------------------|--|
| Total Kilowatt- Hours | Total Cost (\$) | |
| 1280 | 128.00 | |
| 1312 | 131.20 | |

Company B y = 0.14x

What is the difference in price per kilowatt hour between Company A and Company B?

Solve each problem.

contractor.

1) Two contractors are bidding on building a house. Contractor A's price is represented in the table below. Contractor B's price is represented by an equation, with y representing the total price and x representing the square feet of the house.

| Contractor A | | |
|----------------|------------------|--|
| Square Feet | Total Price (\$) | |
| 1315 | 144,650 | |
| 1795 | 197,450 | |

$$y = 110x$$

Contractor B

y = 126x

2) Two companies are selling sugar by the pound. The cost of sugar for Company A is represented in the table below, while the cost for Company B is represented by an equation,

Find the total price you'd get from building a 1,821 sq/ft house from the cheapest

| Company A | | |
|-----------------|--------------------|--|
| Total Pounds | Total Cost (\$) | |
| 14 | 4.06 | |
| 12 | 3.48 | |

with y representing the total cost in dollars for x pounds of sugar.

$$y = 0.29x$$

Company B y = 0.29x

Find the total cost in dollars of buying 19 pounds of sugar from the more expensive company.

3) Two companies are selling electricity by Kilo-watt hour. The cost of electricity for Company A is represented in the table below, while the cost for Company B is represented by an equation, with y representing the total cost in dollars for x kilowatt hours.

| Company A | | |
|--------------------------|-----------------------|--|
| Total Kilowatt- Hours | Total Cost (\$) | |
| 1280 | 128.00 | |
| 1312 | 131.20 | |

$$v = 0.10x$$

What is the difference in price per kilowatt hour between Company A and Company B?

| Company | F |
|-----------|---|
| v = 0.14x | - |

| -3 | 67 | 33 | 0 |
|----|----|----|---|
