

**Solve each problem.****Answers**

- 1) Olivia was making baggies of cookies with seven cookies in each bag. If she had two chocolate chip cookies and twelve oatmeal cookies, how many baggies could she make?
- 2) A pet shelter had forty-five puppies when another eighteen were brought in. If seven puppies a day are adopted, how long would it take for all of them to be adopted?
- 3) Kaleb was helping the cafeteria workers pick up lunch trays, but he could only carry three trays at a time. If he had to pick up two trays from one table and seven trays from another, how many trips will he make?
- 4) At a company picnic fifteen managers and forty-eight employees decided to start a game of volleyball. If they split into nine teams how many people would be on each team?
- 5) While playing at the arcade, Henry won six tickets playing 'whack a mole' and two tickets playing 'skee ball'. If he was trying to buy candy that cost four tickets a piece, how many could he buy?
- 6) Jerry was organizing his baseball cards in a binder with six on each page. If he had seven new cards and seventeen old cards to put in the binder, how many pages would he use?
- 7) Isabel's old washing machine could only wash nine pieces of clothing at a time. If she had to wash fifty-two shirts and two sweaters how many loads would she have to do?
- 8) For a birthday party Mike bought twenty regular sodas and four diet sodas. If his fridge would only hold three on each shelf, how many shelves would he fill up?
- 9) The school's baseball team had seven new players and thirty-five returning players. If the coach put them into groups with seven players in each group, how many groups would there be?
- 10) Nancy and her friends were recycling paper for their class. For every eight pounds they recycled they earned 1 point. If Nancy recycled twenty-six pounds and her friends recycled thirty-eight pounds, how many points did they earn?
