Solve each problem.

1) For Halloween Emily received thirty-five pieces of candy from neighbors and twenty-one pieces from her older sister. If she only ate seven pieces a day, how long would the candy last her?

2) For homework Carol had eight math problems and eight spelling problems. If she can finish eight problems in an hour how long will it take her to finish all the problems?

3) Sam was helping the cafeteria workers pick up lunch trays, but he could only carry eight trays at a time. If he had to pick up forty-six trays from one table and twenty-six trays from another, how many trips will he make?

4) At a company picnic twenty-five managers and seventeen employees decided to start a game of volleyball. If they split into six teams how many people would be on each team?

5) Faye's class is going on a field trip to the zoo. If each van can hold four people and there are two students and six adults going, how many vans will they need?

6) George was organizing his baseball cards in a binder with seven on each page. If he had forty new cards and nine old cards to put in the binder, how many pages would he use?

7) Lana's old washing machine could only wash four pieces of clothing at a time. If she had to wash five shirts and three sweaters how many loads would she have to do?

8) While playing at the arcade, Cody won twelve tickets playing 'whack a mole' and fifteen tickets playing 'skee ball'. If he was trying to buy candy that cost three tickets a piece, how many could he buy?

9) Edward had saved up seven dollars. If he received another thirteen dollars for his allowance, how many five dollar toys could he buy?

10) Nancy uploaded five pictures from her phone and four from her camera to Facebook. If she sorted the pics into three different albums with the same amount of pics in each album, how many pictures were in each of the albums?

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

1-10	90	80	70	60	50	40	30	20	10	0
