

**Solve each problem.****Answers**

- 1) Will was putting his spare change into piles. He had six piles of quarters and four piles of dimes. If each pile had six coins in it, how many coins did he have total?
- 2) Henry and his friend were buying trick decks from the magic shop for six dollars each. How much did they spend if Henry bought three decks and his friend bought two decks?
- 3) At the town carnival Victor rode the ferris wheel seven times and the bumper cars three times. If each ride cost seven tickets, how many tickets did he use?
- 4) Robin bought four new chairs and six new tables for her house. If she spent seven minutes on each piece furniture putting it together, how many minutes did it take her to finish?
- 5) Tiffany's favorite band was holding a concert where tickets were three dollars each. Tiffany bought five tickets for herself and her friends and two extra tickets in case anyone else wanted to go. How much did she spend?
- 6) Cody bought eight boxes of chocolate candy and two boxes of caramel candy. If each box has nine pieces inside it, how much candy did he have total?
- 7) Faye had seven pages of math homework and two pages of reading homework. If each page had six problems on it, how many problems did she have to complete total?
- 8) While playing a trivia game, Adam answered three questions correct in the first half and five questions correct in the second half. If each question was worth eight points, what was his final score?
- 9) April's discount flowers was having a sale where each flower was six dollars. If Isabel bought two roses and two daisies, how much did she spend?
- 10) At Oliver's Restaurant a group with seven adults and two children came in to eat. If each meal cost three dollars, how much was the bill?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
