Two Step Problems   Name: _____

Solve each problem.

1) Faye baked twelve cupcakes for her school's bake sale. If her brother, Todd, ate four of them how many packages could she make if she put two cupcake in each package?

2) Haley had forty-four homework problems. She finished thirty-four of them but still had five pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?

3) A pet store had one hundred puppies. In one day they sold twenty-eight of them and put the rest into cages with eight in each cage. How many cages did they use?

4) Frank bought fifty-seven tickets at the state fair. He spent fifteen tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost seven tickets, how many rides could he go on?

5) Debby picked eighty-two flowers for her friend's wedding. She was making bouquets with eight flowers in each one. If fifty of the flowers wilted before the wedding, how many bouquets could she still make?

6) A store had thirty-six coloring books in stock. They ended up putting them on sale and getting rid of nine of them. The put the ones they still had onto shelves with three on each shelf. How many shelves did they use?

7) Cody had eighty-nine pieces of clothing to wash. He put seventeen of them in one load, but decided to split the rest into eight equal loads. How many pieces of clothing could go in each of the small loads?

8) Jerry made ninety-five dollars mowing lawns over the summer. If he spent fourteen dollars buying new mower blades, how many nine dollar games could he buy with the money he had left?

9) Lana had one hundred eleven files on her computer. She deleted forty-eight of them and put the rest into folders with nine files in each one. How many folders did Lana end up with?

10) There are sixty-five students trying out for the school's trivia teams. If forty-nine of them didn't get picked for the team and the rest were put into two groups, how many students would be in each group?

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

Name: **Answer Key**

Solve each problem.

Answers

1) Faye baked twelve cupcakes for her school's bake sale. If her brother, Todd, ate four of them how many packages could she make if she put two cupcake in each package?

1. _____**4**_____

2. _____**2**_____

2) Haley had forty-four homework problems. She finished thirty-four of them but still had five pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?

3. _____**9**_____

4. _____**6**_____

3) A pet store had one hundred puppies. In one day they sold twenty-eight of them and put the rest into cages with eight in each cage. How many cages did they use?

5. _____**4**_____

6. _____**9**_____

4) Frank bought fifty-seven tickets at the state fair. He spent fifteen tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost seven tickets, how many rides could he go on?

7. _____**9**_____

8. _____**9**_____

5) Debby picked eighty-two flowers for her friend's wedding. She was making bouquets with eight flowers in each one. If fifty of the flowers wilted before the wedding, how many bouquets could she still make?

9. _____**7**_____

10. _____**8**_____

6) A store had thirty-six coloring books in stock. They ended up putting them on sale and getting rid of nine of them. The put the ones they still had onto shelves with three on each shelf. How many shelves did they use?
